Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18628

Description

I install QGIS2.2 64bits; then try to install PyQt4-4.10.4-gpl-Py2.7-Qt4.8.5-x64; I want to install "postgis_viewer" plugin for PostGIS2.1; Then get this error info from OSGeo4W Shell. How to fix this?

History

- Resolution set to invalid

- Status changed from Open to Closed

- Subject changed from sip module impletements API v11.0 but the qgis.core module requires API v10.0 to sip module implements API v11.0 but the qgis.core module requires API v10.0

OSGeo4W/QGIS is shipped with PyQt. You don't need seperately install it.
