QGIS Application - Bug report #10103
QGIS issue with 64bit uninstaller dialog

2014-04-22 08:17 AM - Jonathan Moules

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Build/Install		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18571

Description

We've got both the 32 and 64bit versions of the weekly (from http://www.qgis.org/downloads/weekly/) - our IT department have scripted it.
They can script away the Uninstall-previous-version dialog for the 32bit installer (so that it just happens automatically which is desired), but for some reason the 64bit one can't be and so the user has to click the button. They explained it thus:

> *What i found is that 32 bit installer goes into C:\\Program Files and the 64 bit installer suppose to go into C:\\Program Files (x86) but ends up going into the C:\\Program Files.*

> *When i run the uninstaller in 64 bit (C:\\Program Files\\\\QGIS Weekly\\Uninstall-QGIS.exe) it will go through the motions uninstalling the previous version of QGIS when its completed, another pops-up (the one i mentioned) appears that its has detected previous version of QGIS and if you're ok to uninstall. Clicking OK completed the process.*

History

#1 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#2 - 2018-09-23 10:22 PM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Open to Closed

- Description updated
