Description

When I use batch processing, I can't set my vector parameter.
If I choose "select from open layers" and I select only one, I get this :

```
Traceback (most recent call last):
  File "/home/etienne/.qgis2/python/plugins/processing/gui/BatchInputSelectionPanel.py", line 93, in showLayerSelectionDialog
    self.text.setText(layers[selected[0]])
TypeError: QLineEdit.setText(QString): argument 1 has unexpected type 'QgsVectorLayer'
```

However, if I click "select all", it works.
