QGIS Application - Bug report #10993
Virtual fields: if selecting integer as data type, then field shows as decimal

2014-07-31 10:32 AM - Giovanni Manghi

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:	Virtual Fields		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19336

Description

Steps:

- add a virtual field using a geometry function like $area
- choose "integer" as data type
- have a look at the table of attributes, values are shown with the max possible of decimals numbers

On the other hand when choosing a decimal data type the number of chosen decimals seems to be respected.
