

QGIS Application - Feature request #10551

dragging an annotation marker should respect / make use of snapping settings

2014-06-11 07:31 PM - Mathieu Pellerin - nIRV

Easy fix?: No	Copied to github as #: 18958
Description	
That's an easy one: when dragging a {text, html, form} annotation marker, it should respect and make use of the user-set snapping settings. That way, annotation can be precisely geo-located over a given geographic point.
