Description

Good afternoon,

I had a bug thi morning with qgis last weekly version (2.3.0 Master - 6a17538)

Adding a wfs layer (http://ws.carmen.developpement-durable.gouv.fr/WFS/45/foncier_cen) abort when "cache feature" is checked.

Layer can be add when unchecked.

Best regards and thanks again and again for the work you do !

Mathieu

- Status changed from Open to Feedback

I can't confirm on linux/64bit - works fine for me.

#2 - 2014-06-13 06:48 AM - Mathieu Bossaert

Ok sorry for the inconvenience, it works now with the same layer in a new Qgis instance.
