QGIS Application - Bug report #11765
Untranslatable strings from ./src/core/qgscolorscheme.h

2014-12-01 12:02 AM - zirneklitis -

Status:	Closed		
Priority:	Normal		
Assignee:	QGIS Translation Team		
Category:	Translations and international		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	any	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19997

Description

The translation for the strings included in the file ./src/core/qgscolorscheme.h does not work. There are three translatable strings:

..

```
virtual QString schemeName() const { return QT_TR_NOOP( "Recent colors" ); }
```

..

```
virtual QString schemeName() const { return QT_TR_NOOP( "Standard colors" ); }
virtual QString schemeName() const { return QT_TR_NOOP( "Project colors" ); }
```

..

They are recognized and extracted in *.ts file with "lupdate-qt4". But the translation does not work, e.g., no luck with:

```
&lt;context&gt;
  &lt;name&gt;QgsRecentColorScheme&lt;/name&gt;
  &lt;message&gt;
    &lt;location filename="qgis/src/core/qgscolorscheme.h" line="-50"/&gt;
    &lt;source&gt;Recent colors&lt;/source&gt;
    &lt;translation type="unfinished"&gt;Nesen lietotās krāsas&lt;/translation&gt;
  &lt;/message&gt;
&lt;/context&gt;
```

(see the attached screen shot)
