

QGIS Application - Feature request #11140

Update attributes of a joined layer automatically

2014-09-04 07:10 AM - Joseph Liam

Status: Closed	
Priority: Normal	
Assignee:	
Category: Attribute table	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 19468
Description	
Layer_A is joined with Layer_B.	
If you change some attributes of Layer_B and save the edits, it would be ideal for those same attributes to also be updated in Layer_A. Otherwise, the only current way to update Layer_A is by either reloading the project or re-joining Layer_B.
