QGIS Application - Bug report #12079
Identify highlight color does not take alpha channel into account

2015-01-28 08:05 AM - Regis Haubourg

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Canvas		
Affected QGIS version:	3.0.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20275

Description

Hi,
when setting a custom color for highlighting identified features, alpha channel / transparency is not applied.
That would be nice to let a user see what's under those borders, and that would be more consistent with color picker UI.
Cheers
Régis

History

#1 - 2015-01-28 08:38 AM - Paolo Cavallini

- Subject changed from Identify highlight color does not take alpha channel into acount to Identify highlight color does not take alpha channel into account

#2 - 2017-05-01 01:07 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#3 - 2018-02-25 10:58 AM - Regis Haubourg

- Resolution set to fixed/implemented

- Description updated

still true in master, borders and lines are masked by a non transparent rubberband, even if a transparency is applied to it in the general options.
This does work for polygon fill.

#4 - 2018-02-25 10:58 AM - Regis Haubourg

- Affected QGIS version changed from 2.6.0 to 3.0.0

#5 - 2018-02-25 05:15 PM - Giovanni Manghi

- Resolution deleted (fixed/implemented)

#6 - 2018-10-23 11:45 AM - Regis Haubourg

- Status changed from Open to Closed

- Resolution set to fixed/implemented
