QGIS Application - Bug report #11747
refresh html button does nothing

2014-11-26 09:54 AM - Mar Tin

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	2.6.0	**Regression?:**	No
Operating System:	windows 64 bit	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19980

Description

Since updating from 2.4 to 2.6 the print composers "refresh html" button doesnt work anymore. Before I could easily e.g. change the font-size in my little html codes to make tables, and a click on refresh html would automatically update the html frame in the print composer. Now not even reloading the html file doesnt work. I have to delete the whole box, insert a new one and point it to the updated file.

I'm attaching an example html table.
