QGIS Application - Bug report #12950
Fields ignored in overlapping polygons

2015-06-12 06:05 AM - Samuel Fernando Mesa Giraldo

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Processing/QGIS		
Affected QGIS version:	2.8.2	**Regression?:**	No
Operating System:	Arch Linux	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21030

Description

The following occur when I perform the overlap between layers of polygons. Attached files for replication. The CapaA.shp, CapaB.shp and CapaD.shp layers, each has the "nombre" field. By making the overlap of three layers, eg

(A Union B) intersection D

You should give the three fields: nombre (CapaA.shp), nombre_1 (CapaB.shp) and hpnombre_2 (CapaD.shp), yet it is ignored one of the fields, without providing the complete info of the three layers, ie, one the fields are overwriting.

- Status changed from Open to Feedback

- Category changed from Vectors to Processing/QGIS

- File mx1.png added

I cannot confirm (see attached image) using the QGIS tools available in the Processing toolbox.

Did you use the tools in the "vector" menu or the ones in the processing toolbox?

Please also test qgis master.

Giovanni, excuse me I have seen that it works really well on another computer with the same version of QGIS in Arch Linux. Please close this petition.

Thanks.
