

QGIS Application - Feature request #12975

sync connections between browser and "Add Layer(s) from WM(T)S Server Dialoge"

Category: Browser	
Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 21053
Description	
Is it possible to have the browser in sync with the uConnections displayed in the "Add Layer(s) from WMS Server Dialoge"?	
It's a bit confusing that you can make a connection in the Browser window and then it does not show up in the dialogue when you click the add wm(t)s button.

- Priority changed from Normal to Low
- Status changed from Open to Feedback
- Subject changed from [Browser (2)] to sync connections between browser and "Add Layer(s) from WM(T)S Server Dialoge"

Just tested on both Windows and Linux and any connection created within the browser immediately shows also in the "add W*S layer". What version of qgis are you using?

NB

Please use meaningful subjects, it helps a lot testers, developers and keeping the bug tracker clean. Thanks.
