Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20336

Description

Hi,

in the Transifex QGIS-desktop project there is a mistake concerned attribute table order, in line 11874 it is written:

"Each column can be sorted by clicking on its column header. A small arrow indicates the sort order (downward pointing means descending values from the top row down, upward pointing means ascending values from the top row down)."

but in QGIS the downward pointing arrow means ascending values and upward pointing arrow means descending value.

Enrico
