QGIS Application - Bug report #13453
QGIS crashes when applying rule based label using data defined setting

2015-09-29 06:35 PM - Nyall Dawson

Status:	Closed		
Priority:	Severe/Regression		
Assignee:	Martin Dobias		
Category:			
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	21500

Description

Steps to reproduce:
1. add a new rule based label
2. apply a data defined override to a property in the label
3. try to apply the layer settings - crash!

Associated revisions

Revision 1c877f11 - 2015-09-30 06:36 AM - Martin Dobias

Fix another crash with rule-based labeling + data-defined properties (fixes #13453)

The writing of data-defined properties to XML was using invalid data.
Also fixes a possible memory leak in assignment operator.
Thanks Nyall for help tracking it down!
