Pull Request or Patch supplied:	No	**Resolution:**	invalid
Easy fix?:	No	**Copied to github as #:**	21662

Description

Voting and rating is a good thing, and in general I find the QGIS plugin page (plugins.qgis.org) very useful and well crafted.
However, I have found that it is not intuitive for a first time user to get the voting right. I clicked randomly at the star row for a plugin, thinking that I might get statistics on the voting for that plugin, but that turned out to be a vote (unfortunately, I clicked in the left part of of the row of stars - hence contributing to lowering the rating of that plugin...).

It would be a nice improvement if a user that clicks on the row of stars is asked to confirm his / her vote before it gets recorded by the system.
