QGIS Application - Feature request #15622
Introduce per layer actions

2016-09-26 11:22 PM - Andreas Neumann

Status:	Closed

Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Easy fix?:	No	**Copied to github as #:**	23545	

Description

It should be possible to have a special type of action that works on a selection of features and not just on a single feature. This is especially useful for Python actions.

These actions should be made available in the tool bar of the attribute table or form and be placed either as individual buttons or as a drop-down list. In the action manager there should be a way to define whether an action should be a layer action or a standard per feature action.

The per layer action would return a reference to the layer and a list of selected features.

History

#1 - 2017-01-11 04:38 AM - Andreas Neumann

- Resolution set to fixed/implemented

- Status changed from Open to Closed

implemented with https://github.com/qgis/QGIS/pull/3702
