Description

Has there been any discussion about implementing head/tail breaks as a choropleth categorization on layers? It seems like it wouldn't be difficult to implement. Here's a paper that introduces the concept:

Hi

There is already a related implementation in Axwoman 6.3 (function name "HT mapping", http://fromto.hig.se/~bjg/axwoman/) about using head/tail breaks for choropleth maps, and for point and polyline feature as well.
