QGIS Application - Feature request #13889
Open modules instead of table

Easy fix?:	No	**Copied to github as #:**	21911

Description

If an user opens the table, then selects the Form view, this choice gets forgotten, and must be clicked again every time he opens the table.
Better remember it, or use the setting from "Automatically open a form" (if chosen, the table opens directly in Form mode).
