

QGIS Application - Bug report #15984

Colour bars in colour chooser UI are rendered with interleaved stripes

2016-12-14 05:57 PM - Nikolay Lebedev

Status: Closed	
Priority: Normal	
Assignee: Peter Petrik	
Category: mac_os_specific	
Affected QGIS version: 3.5(master)	Regression?: No
Operating System: OS X	Easy fix?: Yes
Pull Request or Patch Applied: Yes	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 23900
Description	
<p>I'm running QGIS master on OS X with hidpi retina display. I don't know if it's related to resolution, but color bar gradients in color chooser UI are rendered as interleaved color stripes (screenshot attached). Guess it has something to do with display resolution.</p>
