Crashes QGIS or corrupts data:		**Copied to github as #:**	12140

Description

Hi Marco,

trying to print a horizontal layout I get the extent of a vertical page, with the bottom of the page greyed out.

Hi Milena

Do you print with the pdf export button or with the printing button (with pdf printer)? In the second case, there is a second portrait/landscape setting in the printing dialog. Selecting landscape here should already provide a workaround for the very short time.

I'm going to have a look if it is possible to already preset the appropriate type in the printing dialog.

Regards,
Marco

#2 - 2009-11-13 07:58 AM - Marco Hugentobler

- Resolution set to fixed
- Status changed from Open to Closed

Done in commit:878e9c80 (SVN r12102). I plan to also initialize the paper size with the settings from the composition (currently always A4 by default).
