QGIS Application - Bug report #15040
Displacement point Symbology: Data defined rotation for subrenderer symbol doesn't work with layer field value

2016-06-16 04:24 AM - Harrissou Santanna

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Affected QGIS version:	2.14.3	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22985

Description

Layer properties > Displacement point rendering
Renderer settings > for the rotation of the symbol, apply a data defined expression using one of the layer's fields
Apply
symbols are rotated but they all follow one direction within a group (seems to be the value of the first point fetched in the group) instead of each symbol following its own value.
Trying an expression like *rand (1, 360)*, each symbol was oriented differently.
