

QGIS Application - Bug report #17017

QgsDataSourceURI missing from qgis.core

2017-08-14 06:19 PM - Axel Hörteborn

Status: Rejected	
Priority: Normal	
Assignee: Denis Rouzaud	
Category: Python bindings / sipify	
Affected QGIS version: master	Regression?: No
Operating System: Windows x64	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 24916

Description

Really odd bugg I cant import QgsDataSourceURI from qgis.core

if I run `dir(qgis.core)` in the python console I find `QgsDataSourceURI` among the classes.

When I try `import qgis.core.QgsDataSourceURI`

I get: `AttributeError: module 'qgis.core' has no attribute 'QgsDataSourceURI'`

History

#1 - 2017-09-28 09:38 AM - Denis Rouzaud

- Status changed from Open to Feedback

can you try from `qgis.core` import `QgsDataSourceURI`

this works for me

#2 - 2017-11-11 01:16 PM - Alexander Bruy

- Resolution set to invalid

- Status changed from Feedback to Rejected

In master this class was renamed to `QgsDataSourceUri`
