QGIS Application - Feature request #16310
Persist folder location to save/restore batch processing config file

2017-03-07 09:19 AM - Spencer Gardner

Status:	Closed		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/Core		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	24220

Description

When I load a saved batch processing configuration file the Open File dialog always starts in my home directory, even if I've selected a file from a different directory previously during the same session. It would be nice for Processing to remember the folder location that I accessed last within the same session and start the dialog at that location so I don't have to navigate the directory structure to open a batch config file.
