Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:			
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11633

Description

After moving or removing items in the map composer - using qGIS 1.0.1 under Windows XP - SP3, it seems old frames are lines remain on the sheet and are included in the map, when I export it to e.g. jpg-format.

History

#1 - 2009-04-12 02:44 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

In trunk and 1.0 branch, there is now an additional check if the last item frame has been removed. I think this fixes the bug. Please reopen it if you still have a case where it occures.
