

QGIS Application - Bug report #17533

Some expressions don't work with refactor fields algorithm

2017-11-23 09:45 AM - Andreas Neumann

Status: Closed	
Priority: Normal	
Assignee: Matthias Kuhn	
Category: Processing/QGIS	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 25430

Description

Some expressions can't be used in the refactor fields algorithm. The preview in the expression editor works fine, but the resulting field in the output remains empty.

Example of expressions that don't work:

```
represent_value("some_field")
```

relation_aggregates:

```
--Anzahl Sonden. Feld anz_sonden
```

```
relation_aggregate(  
  relation:='Erdwärmesonden',  
  aggregate:='sum',  
  expression:="anzahl_sonden"  
)
```

```
--Kumulierte Bohrlänge. Feld gesamt_bohrlaenge
```

```
relation_aggregate(  
  relation:='Erdwärmesonden',  
  aggregate:='sum',  
  expression:="anzahl_sonden" * "bohrtiefe"  
)
```
