Description

Hi !

The new native XYZ tiles provider is awesome.

But it doesn't seem to support local files. URLs like file:///mypath/{z}/{x}/{y}.png should work, but they don't load.
The console shows

Tile request error (Status:; Content-Type:; Length:24803; URL:
file:///C:/Users/Olivier/Dropbox/Backups/UrbaSEN_Gandi/urbamonde_vps_tiles/ign_2010/17/59211/60097.jpg)

Could it be that it just fails because the code is expecting an http status ?

Thanks !
