QGIS Application - Bug report #17371
Problem

2017-11-01 09:22 AM - Jorge Useche

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	GRASS		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Ubuntu 17.10 Artful Aardvark	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25268

Description

I'm using the instructions of https://github.com/qgis/QGIS/blob/master/INSTALL#L186 to compile QGIS 3 in Ubuntu Artful, but in process of "make -j8" (In my case) I'm getting the error:

```
Scanning dependencies of target translations
[ 96%] Generating ../output/i18n/qgis_ar.qm
lrelease: could not find a Qt installation of ''
i18n/CMakeFiles/translations.dir/build.make:97: recipe for target 'output/i18n/qgis_ar.qm' failed
make[2]: *** [output/i18n/qgis_ar.qm] Error 2
```

I'm seen that error corresponds to https://stackoverflow.com/questions/16607003/qmake-could-not-find-a-qt-installation-of
And I've solve it using $ sudo apt install qt5-default

I've report this dependency in previous issue #17177

Thanks :)
