

QGIS Application - Bug report #18509

XYZ-Layer "Network time out"

2018-03-22 09:10 AM - Thomas Ramm

Status: Closed	
Priority: Normal	
Assignee:	
Category: Web Services clients/XYZ	
Affected QGIS version: 3.0.0	Regression?: Yes
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: no timely feedback
Crashes QGIS or corrupts data: No	Copied to github as #: 26397

Description

Hello,
we have our own TMS Server within our company. QGIS 3 can't load any tiles from this server. i have also QGIS 2.18 installed, there i can open the tiles from our Server.

I get only the Network error "" if i copy'n past the url i can open the tiles in the browser. So there is no misstyping in the url.
Any Ideas what is different to QGIS 2.18 code?

We have no access to the internet, only OSM is allowed.

I test it with ProxyServer enabled (for OSM) and disabled. The internal Server doesn't need any proxy but i have no other idea to test some other changes than TimeOut and Proxy.

So I also set the timeout to a higher time.

example message: 2018-03-22T09:06:07 WARNING Network request <https://tms.manserv.net/tiles/10/536/339.png?o=56&l=de> timed out

Connections to OSM Tile Server working in QGIS 3

Without a publicly available endpoint that we can actually test it will be very difficult to help.

Did you check for any SSL related error btw?
