QGIS Application - Bug report #22039
Incorrect worldfile generation

2019-05-09 04:04 PM - luca76 -

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	3.6.2	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29853

Description

On QGIS 2.18 and 3.6, opening the Print Composer and saving with it to a JPEG with Worldfile, the JPW is generated as here:

0.076330820580

0.000000000000

0.000000000000

-0.076336884245

666772.714626354864

5102079.949439144693

There are empty lines between numbers and two empty lines after the last number.
They should not be there. For this reason, AutoCAD cannot recognize these worldfiles.
