QGIS Application - Bug report #21333
QGIS crashing when adding hyperlink into the Attribute Table

2019-02-21 01:51 PM - Nitzan Matan

Status:	Rejected		
Priority:	High		
Assignee:	Nitzan Matan		
Category:	Attribute table		
Affected QGIS version:	3.4.4	**Regression?:**	No
Operating System:	64-bit	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	29151

Description

I tried to display a photo with hyperlink. I set the layer Attributes From properties as follow: **Widget Type**: Attachment, **Storage Mode**: File paths, **Display button to open file dialog marked**, **Use hyperlink for document (read-only)** marked and **Integrated Document Viewer Type**: Image.

When I tried to add the hyperlink to the shapefile from the Attribute Table , the QGIS is crashing
I tried to change setting, and worked from anther PC, it still crushing.
The log data is attached in a word file, it also listed in StackExchange [[https://gis.stackexchange.com/questions/312375/qgis-3-4-4-crashing-when-adding-hyperlink-into-the-attribute-table]]

- Resolution set to invalid

- Status changed from Open to Rejected

Looks like an issue in the QMS plugin, please report the issue to the authors of the plugin.

#3 - 2019-03-04 04:18 PM - Samuel Wechsler

I can confirm the issue (with geopackages). We are able to add a new feature and select a picture from our network. However QGIS crashes allways when trying to edit the file path of an existing feature (via attribute table). I tried with QGIS3.4.4
