

## QGIS Application - Bug report #20063

### The "output folder" Processing configuration has no effect

2018-10-09 11:46 AM - Giovanni Manghi

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Processing/Core	
<b>Affected QGIS version:</b> 3.3(master)	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 27885
<b>Description</b>	
After changing it in processing general options and restarting qgis, the output folder for temp layer is always the one defined by default after a normal installation.	
Tested on master.

settings > options > processing > general > output folder

##### #4 - 2018-10-10 02:50 PM - Nyal Dawson

That's not used for temporary files. It's only used as the default location for "real" outputs.

##### #5 - 2018-10-10 02:53 PM - Giovanni Manghi

- Status changed from Open to Closed

- Resolution set to invalid

| *That's not used for temporary files. It's only used as the default location for "real" outputs.*

so I guess this means there is no option for temp outputs?

**#6 - 2018-10-10 10:29 PM - Nyal Dawson**

That's correct - they are always stored in the /tmp / windows temp folder
