Easy fix?:	No	**Copied to github as #:**	13993

Description

If a user don't want to load all the features of a Postgis layer can build a filter with the query builder. It would e nice also to have the option to limit the features to be downloaded using the canvas Bounding Box, as in the WFS client.

Actually a user must build a query as (example)

the_geom && ST_SetSRID(ST_MakeBox2D(ST_Point(14,43),ST_Point(16,46)),4326)

that is not very handy
