QGIS Application - Bug report #2964
New Labeller settings not applyable

2010-08-23 02:59 AM - Tim Sutton

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Vectors		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	13024

Description

Hi

I guess you are busy working on the data driven side of things, but I thought I would mention that in trunk r1429 you can no longer save / apply your labelling settings.

Also the dialog has grown vertically to the point that it no longer fits on my 1366x768 screen comfortably.

Regards

Tim

Is the problem with save / apply still true?

#2 - 2011-06-01 04:53 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

Closing due to lack of feedback. I cannot reproduce the problem. Please reopen if still true.
