QGIS Application - Bug report #5647
Segmentation Fault when saving the project from close window button

2012-05-27 07:56 AM - Salvatore Larosa

Status:	Closed		
Priority:	Severe/Regression		
Assignee:			
Category:	Project Loading/Saving		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	15208

Description

When I click on close window button a dialog window asking me if I want to save the project, if I click on save and then cancel button, QGIS crashes!

History

- Status changed from Open to Feedback

Hi Salvatore, I can quite understand well the sequence to try replicate the issue. Can you confirm it with the lastest builds? it is a regression since 1.7.4?

#2 - 2012-05-30 01:23 PM - Salvatore Larosa

I confirm, it is a regression since 1.7.4!
Also the last build is affected!

#3 - 2012-05-30 01:29 PM - Giovanni Manghi

- Priority changed from High to Severe/Regression

Since it is a regression is then a blocker. Anyway I still don't understand clearly the steps to replicate the issue.

I suppose you mean that the window should stay open, when you "cancel" the save. What happens is that the project isn't saved, but the application is still closed - but there's no crash.

At least not here. Did you try without any plugins?

Now in cbd88ee I haven't segfault!

but I remember that also Macho, on IRC, confirmed this issue!
