Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	13041

Description

Hi,

I have tried to install Quantum GIS version
1.5 [QGIS-OSGeo4W-1.5.0-14109-Setup.exe] on
Windows 7 Professional, but the installation
can't finish. The snapshot is here:
http://www.box.net/shared/254cuoi2ea

However, I succeed in installing QGIS version
1.4 on the same computer.

Best regards,
Gatot Pramono

Is the 1.6 installer working?

#2 - 2011-03-02 08:01 AM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from Open to Closed

I assume it works, as I have installed in many PCs. Please check and reopen if appropriate.
