QGIS Application - Feature request #3135
GRASS analyses on the fly

2010-10-19 06:06 AM - Paolo Cavallini

Status:	Closed		
Priority:	Low		
Assignee:	Lorenzo Masini		
Category:	GRASS		
Pull Request or Patch supplied:		**Resolution:**	duplicate
Easy fix?:	No	**Copied to github as #:**	13195

Description

It would be good to have another option for running GRASS analyses on the fly:

- creating a location on the basis of current projection and extent (or of those of a specified layer)
- running the analysis
- deleting the location.

In this way, also people without an understanding of GRASS could run their analyses easily.

History

#1 - 2010-10-21 12:20 PM - Markus Neteler

Addition: the point is that the GRASS toolbox is only accessible when running
a GRASS session. Each GRASS installation contains a "demolocation" which could
be (ab)used to run in background to enable the toolbox.

When then having the real user location, just switch and go.
