Description

I try to download my data from GPS through GPS tool and get an error "The layer is not a valid layer and can not be added to the map". gpsbabel works fine in console, but with QGIS it cannot download data from gps device. Test on Ubuntu 10.04 and [[WinXP]], gpsbabel version 1.3.6.

Is this confirmed? Does not seem serious enough to be blocking.

#2 - 2011-05-31 02:41 AM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Open to Closed

closing for the lack of feedback.
