Affected QGIS version:	master	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	16303

Description

I just updated to the latest build of 0c1faa5.

When I try to open a KML file it has no rows and nothing displays on the screen.

When I opened it in two earlier builds it had 16 rows and it was all displayed properly on the screen.

Google Earth can open and display the data in it without any problems.

History
