Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	16427

Description

Just tested on Windows/osgeo4w waiting for a a Ubuntu build.

Open QGIS, activate the topology checker panel (close the panel, or not).

Close QGIS, the main window will close

After a few seconds a message will pop up saying that qgis has crashed.

Does not happen if the TC panel is not activated.
