QGIS Application - Bug report #3836
Qgis crashes rendering ascii layers

2011-05-21 04:05 AM - duncang -

Status:	Closed		
Priority:	Low		
Assignee:	Giuseppe Sucameli		
Category:	GDAL Tools		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	13894

Description

Rendering any ascii layer causes Qgis 1.6.0 to exit with the following message

Error:

GDAL Error 5: Illegal nYBlockOff value (435) in GDALRasterBand::ReadBlock()

History

#1 - 2011-05-21 11:20 AM - Giovanni Manghi

please attach or link a sample file that causes the problem. Did you tested also qgis-trunk?

#2 - 2011-05-31 11:32 PM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from Open to Closed

I cannot confirm. Please reopen it if necessary, especially if you can attach sample data to reproduce it. Thanks.
