QGIS Redmine (QGIS bug tracker) - Support #3956
Link "create subproject" is missing

2011-06-06 01:15 AM - Giovanni Manghi

Pull Request or Patch supplied:	No	**Tag:**	

Description

In this page

https://issues.qgis.org/projects/qgis-user-plugins

the link that allows to create subprojects (the plugins) is missing, but accessing directly to the form page works

https://issues.qgis.org/projects/new?parent_id=qgis-user-plugins

so should not be a permission problem

History

#1 - 2011-11-24 05:36 AM - Pirmin Kalberer

- Pull Request or Patch supplied set to No

- Assignee changed from Tim Sutton to Pirmin Kalberer

- Status changed from Open to Closed

A redmine update could solve that.

With the new QGIS Hub Redmine plugin, the default parent project is 'User plugins', which solves the problem for now.
