QGIS Application - Feature request #20449 Keep georeferencer dialog open when adding points

2018-11-11 12:08 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Georeferencer	
Pull Request of	r Patch swupplied:	Resolution:
Easy fix?:	No	Copied to github as #: 28269
Description		
I did a lot of geor	eferencing these days, using one scre	en for the georeferencer dialog and another one for QGIS main dialog.
When adding GC	CP points, i have to:	
1. Click the point	t on the raster image	
2. A dialog opens	s on which i have to select that i want t	o use the map canvas
3. The georefere	ncer dialog is minimized and i Click the	e point on the map.
Particularly when	n using two screens. vou don't have ov	erlapping dialogs, hence don't need to minimize the georeferencer dialog. Can we
-		ize that you don't remember the point you placed on the raster and in that case yo
-	-	e process, while having the dialog open would have solved the issue.
