

## QGIS Application - Bug report #20515

### Attribute Table issue: the changes to the column settings are not persistent

2018-11-16 02:25 PM - Geo Dev

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> Attribute table	
<b>Affected QGIS version:</b> 3.5(master)	<b>Regression?:</b> Yes
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 28335
<b>Description</b>	
<p>The column settings are reset each time the Attribute Table is closed.</p> <p>Steps to replicate the issue:</p> <ul style="list-style-type: none"><li>- create a new project</li><li>- load any vector layer with at least one feature and some attributes</li><li>- open the Attribute Table</li><li>- change the columns settings (right-click on the headers and change columns order, visibility and widths)</li><li>- close and reopen the Attribute Table: the changes are lost</li></ul> <p>The changes aren't set to the QgsAttributeTableConfig object (verified using python code).</p> <p>The issue also occurs in QGIS 3.4.1 (new LTR) and it's OS independent.</p> <p>It's a regression since in QGIS 2.18.25 and QGIS 3.2.3 the changes to the column settings are persistent as expected.</p>
