

QGIS Application - Bug report #20561

.qgs translation: ts-file empty

2018-11-20 12:12 PM - David Signer

Status: Closed	
Priority: Normal	
Assignee:	
Category: Project Loading/Saving	
Affected QGIS version: 3.5(master)	Regression?: Yes
Operating System: Linux and Windows	Easy fix?: No
Pull Request or Patch Applied: No	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 28381
Description	
<p>If there is a TS-File created, the only content is:</p> <pre><!DOCTYPE TS> <TS sourcelanguage="en_US"></pre> <p>It's because the translatable object cannot be collected. This connection is never set up.</p> <pre>if (QgsApplication::instance()) connect(QgsApplication::instance(), &QgsApplication::requestForTranslatableObjects, this, &QgsProject::registerTranslatableObjects);</pre> <p>Seems, like it cannot get an instance of the QgsApplication. Possible QgsProject is created before the QgsApplication, what it hasn't before?</p>

Revision f3943f58 - 2018-12-04 12:03 PM - David Signer

do not write logs before QgsApplication instace

because otherwise it creates a QgsProject without a QgsApplication
and translation won't work anymore because it cannot connect the signal to the slot

this fixes #20561
