Affected QGIS version:	3.4.1	**Regression?:**	No	
Operating System:	windows 7	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	no timely feedback	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28455	

Description

Hello

I get the following message when I try to create a new ShapeFile Layer:

2018-11-26T22:54:43   SUCCESS   Layer Exported : Successfully saved vector layer to E:\JOBS\U3A Cambridge\GEO 03 (SP 23) Geographies through Maps\Practice sessions\Project Treasure map\Island.shp

Then I get this OGR:

2018-11-26T23:12:13   WARNING   : OGR Window message: 2018-03-27T22:24:20 WARNING Failed to create file MyShapeFileLayer.shp: Permission denied

File attached.

I am unsure of why is it denied.

As I am still a novice your help much would be much appreciated
