

QGIS Application - Bug report #20636

Saving styles as SLD is broken

2018-11-27 04:08 AM - zackad developer

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Symbology	
Affected QGIS version:	3.4.4	Regression?: Yes
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: worksforme
Crashes QGIS or corrupts data:		Copied to github as #: 28456
Description Step to reproduce: 1. add vector layer to canvas 2. right click on vector layer and select 'Properties' 3. click 'Style' button and select 'Save Style...' The expected sld file can't be generated.		

History

- #1 - 2018-11-27 08:39 AM - Giovanni Manghi
- Subject changed from Can't save style into sld file to Saving styles as SLD is broken
 - Priority changed from Normal to High
 - Affected QGIS version changed from 3.4.0 to 3.4.1
 - Operating System deleted (Ubuntu 16.04)
 - Regression? changed from No to Yes

Confirmed here too.

Message is like:

ERROR: Failed to created SLD style file as /home/giovanni/Desktop/test_style. Check file permissions and retry.

even if saving in a folder that clearly has write permissions.

Hi,

Can you provide some more information on the issue (provider, renderer, ...)?

Because I succeeded in saving the style of a GPKG layer and a PostGIS layer on master and with the 3.4 release.

I've upload a video demo if that would help.

<https://youtu.be/-CLlIm52Rf0> (sorry for bad quality video)

My computer setup:

- Ubuntu 16.04
- using ubuntuGIS repository
- QGIS version 3.4.4
- using shapefile and gpkg as data source

also has this problem with windows version.

- *Status changed from Open to Feedback*

#7 - 2019-02-21 02:05 PM - zackad developer

Unable to reproduce on QGIS 3.4.4 Windows 10 and MacOS.

I think this is platform specific problem.

Maybe my ubuntu installation just to old or something is messed up.
