<b>Description</b>	
Step to reproduce: <ol style="list-style-type: none"><li>1. add vector layer to canvas</li><li>2. right click on vector layer and select 'Properties'</li><li>3. click 'Style' button and select 'Save Style...'</li></ol>	
The expected sld file can't be generated.	

### History

#### #1 - 2018-11-27 08:39 AM - Giovanni Manghi

- Subject changed from Can't save style into sld file to Saving styles as SLD is broken
- Priority changed from Normal to High
- Affected QGIS version changed from 3.4.0 to 3.4.1
- Operating System deleted (Ubuntu 16.04)
- Regression? changed from No to Yes

Confirmed here too.

Message is like:

ERROR: Failed to created SLD style file as /home/giovanni/Desktop/test\_style. Check file permissions and retry.

even if saving in a folder that clearly has write permissions.

Hi,

Can you provide some more information on the issue (provider, renderer, ...)?

Because I succeeded in saving the style of a GPKG layer and a PostGIS layer on master and with the 3.4 release.

I've upload a video demo if that would help.

<https://youtu.be/-CLlIm52Rf0> (sorry for bad quality video)

My computer setup:

- Ubuntu 16.04
- using ubuntuGIS repository
- QGIS version 3.4.4
- using shapefile and gpkg as data source

also has this problem with windows version.

Unable to reproduce on QGIS 3.4.4 Windows 10 and MacOS.

I think this is platform specific problem.

Maybe my ubuntu installation just to old or something is messed up.
