

QGIS Application - Bug report #21171

Arrow line goes beyond arrowhead in map composer

2019-02-05 08:38 AM - nicolas h

Status: Closed	
Priority: High	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 3.4.4	Regression?: Yes
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 28989

Description

When using the arrow item in the map composer, the line of the arrow goes beyond the arrowhead (see attached screenshot).

It worked well with QGIS 2.x.

As I don't want the arrowhead to be round, I use these parameters:

- Arrow outline width: 0 mm
- Arrow head width: 3 mm

History

#1 - 2019-02-07 11:43 AM - Giovanni Manghi

- *Regression?* changed from No to Yes
- *Priority* changed from Normal to High

#2 - 2019-02-07 03:27 PM - Marco Hugentobler

QGIS 2.18 was moving the end arrow by half the arrow width. It seems to me we can just use this solution for QGIS3 too.

<https://github.com/qgis/QGIS/pull/9129> provides a pull request.

#3 - 2019-02-08 05:19 PM - Marco Hugentobler

- *Status* changed from Open to Closed

Fixed in master branch (<https://github.com/qgis/QGIS/pull/9129>). Change will be backported to 3.4 branch
