

QGIS Application - Bug report #22089

.qgz symbolisation fails when path to data is adjusted at startup

2019-05-16 08:48 AM - Klaus Mithöfer

Status: Closed	
Priority: Normal	
Assignee:	
Category: Symbology	
Affected QGIS version: 3.6.2	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 29902
Description	
Dear all,	
If I need to adjust the path to the data at startup in a .qgz project, the symbolisation will not be applied and the layer is mapped with a default setting (single symbol, random color).	
Kind regards Klaus
