

QGIS Application - Feature request #5915
"rotation field" and "size scale field" missing from rules in rule based symbology

2012-06-30 08:05 AM - Giovanni Manghi

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 15357
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>This is a follow up of #5913, as I was trying to find a workaround for that issue. I was surprised to find that in rules of rule based symbology it are not available the "rotation field" and "size scale field" options like are in the other renderers. I don't think that having that options in "add categories to rule" or "add ranges to rule" is the solution, first because this don't work as per #5913 but especially because it should not be necessary to refine rules to have the symbol rotated or scaled.</p>		

History

- #1 - 2012-10-06 02:20 AM - Pirmin Kalberer
 - Target version changed from Version 2.0.0 to Future Release - Nice to have
- #2 - 2014-06-12 02:44 AM - Giovanni Manghi
 - Resolution set to fixed/implemented
 - Status changed from Open to Closed

it works as expected with the (new) data defined properties.
